available all laminated in house from stock.

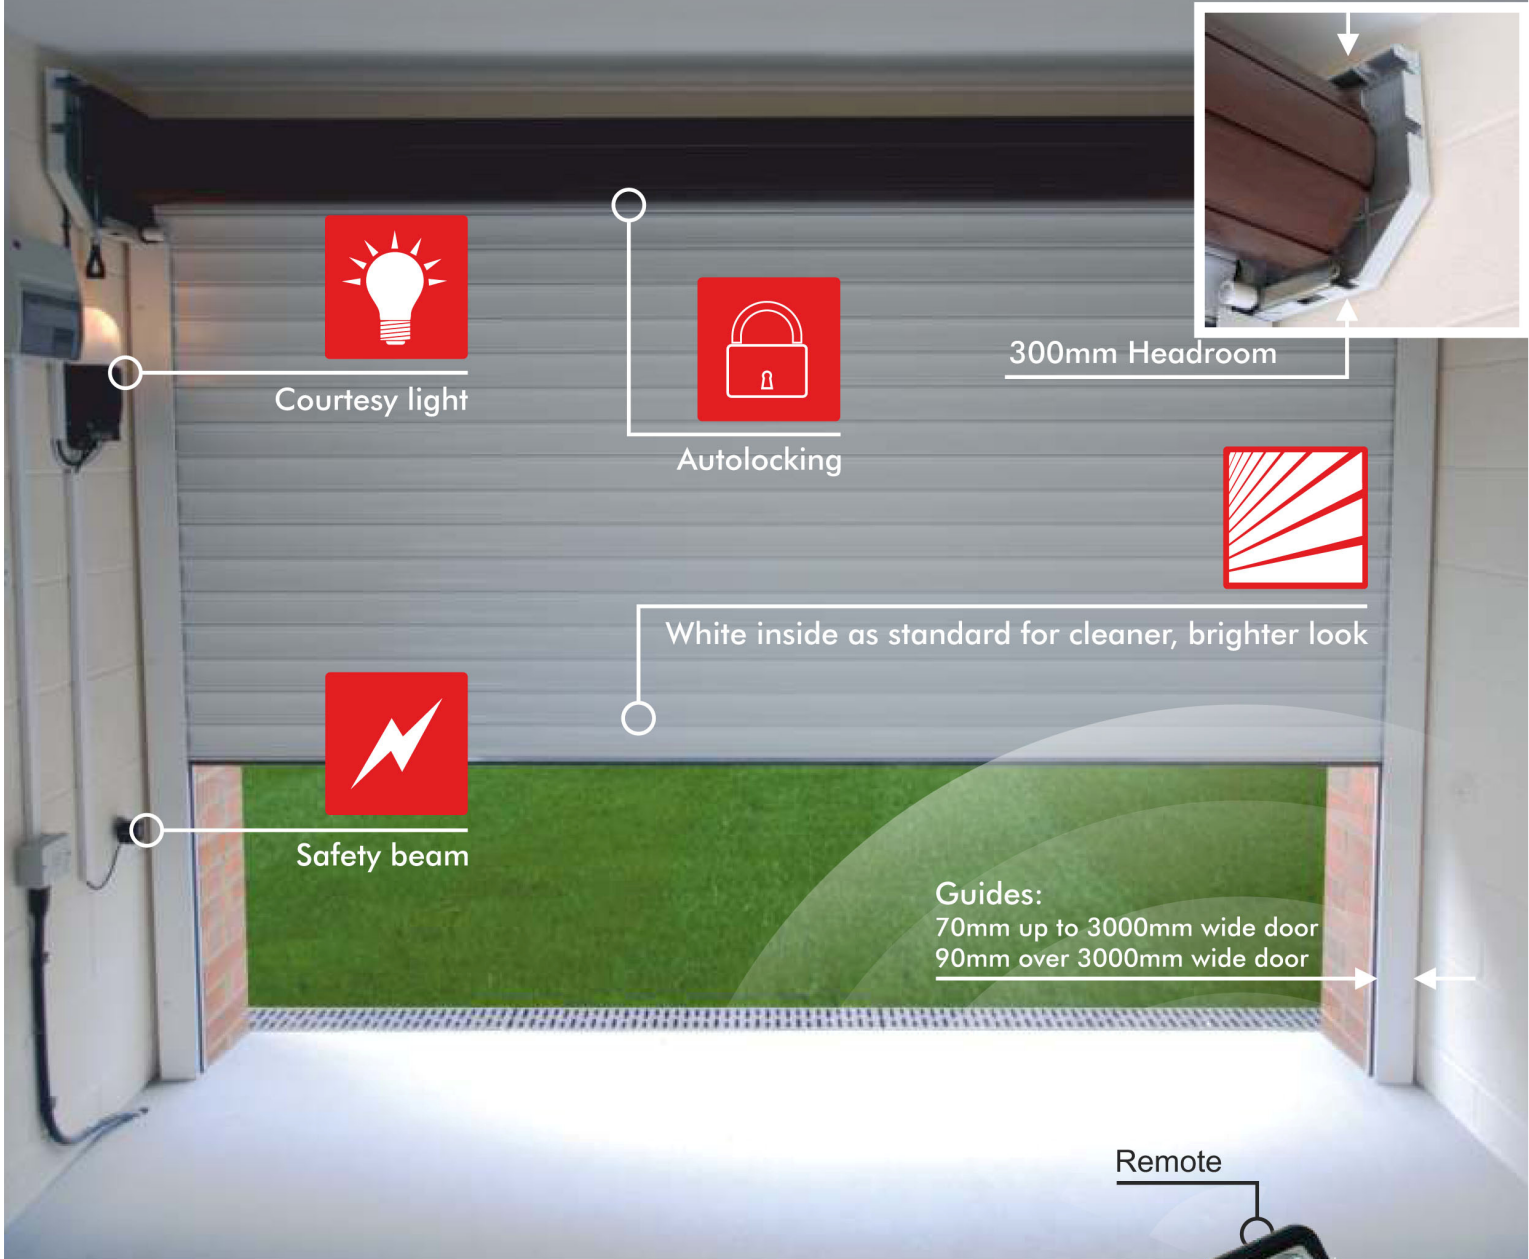

Insulated roller garage doors.

Benefits

Excelsior® is an ideal solution for people who want to gain some extra space in a garage. Deciding on our system can save you a lot of space inside your garage. To be fitted Excelsior® needs only 30cm x 30cm of head-room space. Excelsior® opens vertically so you can park your car close to the door and the Excelsior® still opens without having to reverse. Ideal for short driveways.

Excelsior® is a great insulation barrier, Ideal for integral garages. Save on heating and help the environment.

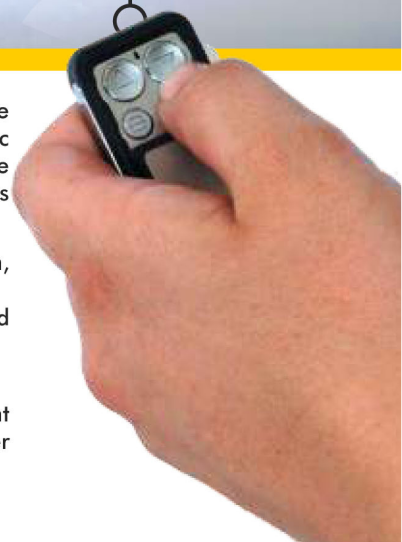

Excelsior® is CE marked to BS EN 13241-1:2003 and security tested to the equivalent of prEN1630. The principle European standard relevant to domestic garage doors identifies all the critical health and safety consideration within the design and manufacture of the product. This gives resellers, users and consumers the necessary reassurance that they are purchasing a safe and reliable product.

Our products are manufactured under an ISO:9001 Quality management system, assuring you that your door is monitored from start to finish. We are very proud of our product. Our every door is checked and photographed proving final inspection is carried out before it leaves our factory.

Our products are manufactured under an ISO:14001 environment management system assuring you that we monitor and reduce our carbon footprint wherever possible.

Standard Features

Curtain is finished in **white as standard** with the optional extra of laminated colours and woodgrain finishes.

Our shutters are **made of aluminium**. Unlike steel this will not rust and looks much more attractive.

Excelsior has **built in autolocks**. When the door is closed a spring clamp device holds the door down tight.

EXCELSIOR® is an impressive 7 Kg/m² making it much **stronger** when closed

The Excelsior's impressive **19mm thick curtain** acts as a sound barrier.

Two **remote** controls, a photocell safety beam and a courtesy light are supplied as standard.

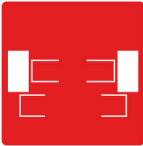

Powered by high quality **tube motor** with manual override and a 5 year warranty.

Excelsior® has a safety brake to comply with stringent European laws. Keeping you safe and legal.

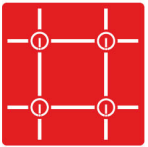

Excelsior is **thermally insulated**. In other words, thermal insulation can keep an enclosed area such as a garage warm. Ideal for integral garages, or garages with bedrooms above. Reducing CO²

Excelsior can be fitted **internally or externally face fixed** or **in between the aperture**

*Full Box required for external fitting.

Optional Extras

The **Safety Grid** comprises two slimline tracks which are simply fitted to the back of the door guides. The tracks are equipped with optical elements which produce an invisible array of 34 infra red beams in a cross grid pattern.

The **Key Pad** is for access without the need to carry hand transmitters.

A lockable **through wall drive**, for garages with no other entrance.

The **Wind Lock Guide** offers added security against extreme weather conditions and attempted *burglaries*.

Laminated or powder coated **matching guides**.

Our in house **laminating** machine can create some fantastic finishes which are impossible to create with a normal paint finish. This is also a tougher finish which carries a **10 year** warranty.

An **alarm** can be added to the control box so it activates on a forced lift. This added to all the other safety features makes the Excelsior the ultimate choice.

Pivo-Glide. Behind the Excelsior® cover there are special sliding end brackets, enabling the curtain to be fed straight into the tracks as the shutter unrolls, thereby reducing wear and scuffing of the curtain edges.

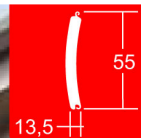

Add the **battery back up** and never worry about power failure again, no pulling on awkward cables to release the door or winding a crank handle. Just carry on using it as normal and wait for power to return.

Full Box prevents accidental finger entrapment and finishes the roller shutter off nicely. The full box is in one piece without unsightly rivets and no sagging unlike with steel hoods. This comes finished in white and can be powder coated any other colour as an optional extra.

Compact insulated roller garage doors

Aluminium insulated roller garage door - EXCELSIOR® Compact

Excelsior® Compact is an ideal solution for our customers who want a roller door but have limited headroom and sideroom availability. Deciding on our system can save you a lot of space inside your garage. To be fitted Excelsior® Compact needs only 200 x 200 mm of head-room space and only 65mm of sideroom. Excelsior® Compact opens vertically so you can park your car close to the door and the Excelsior® Compact still opens without having to reverse. Ideal for short driveways.

Excelsior® Compact is a great insulation barrier, Ideal for integral garages. Save on heating and help the environment.

Your warranty for Excelsior®.

All products are independently tested to the highest standards and are certified to the high safety requirements and performance characteristics of European Standard 13241-1. You can, therefore, be confident that your purchase of our product is a safe investment. Our Guarantee offers the following warranty:

The purchaser is granted a warranty covering the safe and reliable operation of the garage door for a period of 5 years from the date of purchase. This warranty is conditional on the regular inspection and maintenance of the product, in accordance with the installation manual supplied with the door. During the guarantee period the manufacturer

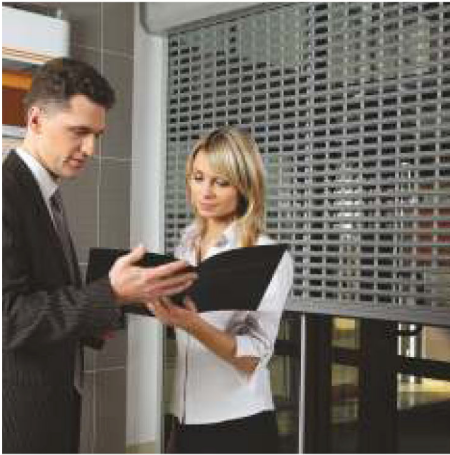

undertakes to repair, without charge, any product which has suffered a proven failure of its safe and reliable operation, provided that the door has been inspected regularly (at least once a year) and maintained correctly, including replacement of wear items when required. Excelsior garage door systems are guaranteed against any form of manufacturing defects for a period of 5 years from the date of purchase. The finish of white powder coated doors is guaranteed for a period of 5 years. In the case of foil laminate finished doors, the exterior finish is guaranteed to provide an effective weatherproof membrane which will resist perforation of the Excelsior door from the weather-side due to corrosion for 10 years.

Furthermore, colour change or fade to the exterior surface will be limited and uniform for the full 10 year period.

Garage Door Automation:

Excelsior electric operators are guaranteed against any form of manufacturing defect for a period of 5 years for mechanical elements, motors and transformers. The motor control unit is guaranteed for 2 years. Remote control accessories and parts are guaranteed for a period of 2 years. No warranty claims will be accepted for wear and tear parts and consumable parts (e.g. light bulbs and batteries).

Our Other Products

Roller Shutter Grilles

These are an ideal solution for any modern shopping mall, to protect high value materials. In shop fronts you are able to display your goods 24 hours behind the protection and elegance of our Roller Shutter Grille.

This adds piece of mind in addition to any alarm systems. They can be specifically designed to blend or complement any particular decor.

Roller Shutter Grilles are in ideal solution for;
Shops, Boutiques, Offices, Café's, Restaurants, Underground Garages, Parking Facilities, etc.

Aluminium Security Roller Shutters

Our 40, 55 and 77 mm aluminium roller shutters for domestic and commercial use. Covering shop front windows, doorways, patio doors, bars, serving hatches, reception areas, food and drink counters to name a few.

These roller shutters offer you a more attractive and rust free alternative to bulky steel roller shutters.

They come in 2 types of profile, extruded or foam filled aluminium.

Shop Front Shutters

The BD77 is made of Aluminium and unlike steel roller shutters this door will not rust and looks much more attractive. BD77 comes with a fully enclosed hood included in the price. This prevents accidental finger entrapment and finishes the door off nicely. The hood is in one piece with no unsightly rivets and no sagging unlike with steel hoods.

BD77 has built in autolocks, when the door is closed a spring clamp device holds the door down tight. The curtain is finished in white as standard with a optional extra of laminated colours and woodgrain finishes.

The BD77 has a safety brake to comply with stringent European laws. Keeping you safe and legal.

Battery Operated Roller shutters

A revolutionary yet simple and unique drive system to suit roller shutters and solar shading.

The Oz Drive system is a low voltage battery operated drive system that is not reliant upon mains power. With operation at the touch of a button this unique system offers a cost effective alternative to current control options with many other additional benefits including a more efficient installation.

Each motor is equipped with a low voltage cable which is connected directly to the back of the wall plate or the fixed switch allowing for power to be generated through the motor.
